

Metals and Alloy (Chemical Test)

Materials Tested (Analyzed) in the Chemical Testing Laboratory include:

- TMT/Reinforced Bars
- Mild steel Flats Angles
- Aluminum Alloys
- Carbon, Low Alloy & Stainless Steels
- Cobalt Alloys
- Copper Alloys
- Jewelry and Dental Alloys
- Magnesium Alloys
- Nickel Alloys
- Super alloys
- Titanium Alloys
- Tool Steels
- Zinc Alloys
- Cast Iron
- Weld Metals
- Gases (Oxygen, Nitrogen, & Hydrogen)
- Carbon & Sulphur by Combustion
- Industrial Water and Process Solutions
- Zinc Coating

We provide both analytical and interpretive expertise, including method development, method validation and identification of unknown materials
